On March 14, 2019, New Zealand sustained its deadliest mass shootings in modern times. A 28-year-old gunman, 28-year-old **Brenton Tarrant**, killed 50 people and injured another 50 at the Linwood Islamic Centre in Christchurch, New Zealand.

The media immediately identified Tarrant as that most noxious of all monsters – an “affiliated white supremacist”. ([Wikipedia](#))

He was interviewed on TV by a pliant and fawning *Newshub* political correspondent O'Brien, who extolls Podesta as “one of the most powerful in U.S. Democratic politics” “someone who understands too well the influence and damage hacking and fake

Promoting the Russian election-meddling meme that Democrats never tire of, Podesta agrees with New Zealand intelligence's warning to Parliament last month that the country is vulnerable to a serious cyber attack from Russia and China. Podesta said:

“Vladimir Putin must be sitting in the Kremlin saying this is the best return on investment ever got – I've got a pliant president of the United States. I'd say very worried.

Calling the country a “juicier target”, Podesta said New Zealand should guard against
information being weaponised as fake news: “What’s new is this weaponisation of

What *The Sun* missed are two other symbols painted in white on Tarrant’s semi-automatic

Below is a pic of the gun. I painted the red circles around the two symbols.
